

Geetansh Malik

Panipat, Haryana 132103 | +91-9996912003 | geetanshmalik337@gmail.com | LinkedIn | Portfolio

Profile Summary

Computer Science student specializing in Full-Stack Development and Agentic AI. Architect of scalable AI-powered systems like InterviewAI, an autonomous orchestration platform built with LangGraph and RAG. Proven track record of delivering cross-platform mobile applications and robust web solutions.

Relevant Coursework

- Generative AI
- Object-Oriented Programming
- Database Systems
- AI & ML
- Computer Networks
- Operating Systems
- Software Engineering
- System Design

Experience

SmartBridge

Nov 2025 – Jan 2026

MERN Stack Intern (Social Media Web App)

Bhopal, Madhya Pradesh

- Architected "IdeaFlux", a MERN-stack social media app with secure JWT authentication and scalable RESTful APIs.
- Integrated AI-powered caption generation features to automate post creation workflows within the MERN application.

Edunet Foundation

Nov 2023 – Dec 2023

Project Intern (Spam Message Detection)

Bhopal, Madhya Pradesh

- Designed and deployed a Machine Learning model for spam classification utilizing advanced NLP techniques.
- Processed a 5,500+ message Kaggle SMS dataset using scikit-learn and NLTK, achieving 85% accuracy via TF-IDF vectorization and Naive Bayes classification.

Projects

InterviewAI – Agentic AI Interview Platform | Next.js, LangGraph, ChromaDB, Docker, RAG

- Built an AI interview platform using Next.js, LangGraph, ChromaDB, and RAG for automated technical and HR interview evaluation workflows.
- Reduced average interview response latency by 35% using asynchronous multi-agent workflows with Redis caching and scalable LangGraph orchestration pipelines.

MindSpace – Cross-Platform Wellness Application | React Native, JavaScript

- Developed a cross-platform wellness application using React Native with reusable UI components and responsive mobile architecture.
- Improved mobile navigation flow and application performance for a smoother cross-platform user experience.

CodeGenix – AI-Powered Code Compiler Platform | MERN Stack, AI Integration

- Built an AI-powered multi-language code compiler platform supporting 10+ languages using the MERN stack, with integrated AI debugging assistance and real-time execution feedback.
- Enabled real-time code execution workflows with scalable backend services and modular API architecture.

IdeaFlux – MERN Social Media Platform | MERN Stack, REST APIs, JWT

- Engineered a full-stack social media platform on the MERN stack with JWT-based auth, RESTful APIs, and a real-time feed supporting post creation, likes, and follow interactions.
- Integrated AI-powered caption generation to automate content creation and improve overall user interaction workflows.

Skills

Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks/Libraries: Next.js, React, React Native, Node.js, Express.js, FastAPI, Tailwind CSS

Databases & Tools: MongoDB, PostgreSQL, Redis, Docker, Git, Linux, ChromaDB

AI & Technologies: LangGraph, RAG, Machine Learning, REST APIs

Education

Vellore Institute of Technology (VIT)

Aug 2022 – May 2026

Bachelor of Technology in Computer Science Engineering | CGPA: 7.86

Bhopal, Madhya Pradesh

Extracurriculars / Certifications

Certifications: MERN Full Stack Program (Ethnus), Python Essentials (Vityarthi), Cloud Computing (NPTEL)

Extracurriculars: Independent Mobile Developer (published on Indus Appstore), Cross-functional Team Collaborator
